Statement from the
Managing Director

"We are at the cusp of an exciting journey as we move forward. The potent combination of India's promising Marathon story over the next decade and our enhanced potential consequent to our strategic expansion provides considerable promise for accelerated growth."

Vijay Singla
Managing Director

Dear Shareholders,

It is a pleasure to connect with you through this statement to share your Company's progress during fiscal 2022-23 and our prospects in the current year and beyond.

The global human conflict between Russia and Ukraine unleashed a wave of uncertainty as restricted trade policies resulted in a sudden spike in commodity prices and a fractured global supply chain, adversely impacting the progress of economies worldwide.

India deftly maneuvered through prevailing challenges to emerge as one of the world's fastest-growing major economies, underpinned by the Government's capital expenditure and robust domestic consumption.

While it created business opportunities for Indian business enterprises, elevated inflation and rising interest costs impacted the business profitability of most enterprises. We were not immune to this reality.

While our revenue from operation was a shade less than the previous year's level, our profits and profitability dropped considerably. We reported a negative bottomline of ₹179.33 lakh.

I believe our below-par performance is an aberration to our positive business journey, and I am confident of a trend reversal in the near term.

My optimism stems from a resurgent India that is taking purposeful strides towards

the vision of Amrit Kaal. Our nation has been recognized by the International Monetary Fund (IMF) as a "bright spot" and a significant driver of global growth and is expected to contribute only 15% of the global growth in 2023. India is at a point where it will continue to clock the highest growth rate among the top five economies in the world.

The remarkable transformation of our economy across multiple dimensions has fuelled unbounded aspirations, hope and optimism for the future.

Moreover, with infrastructure being the central theme for spurring India's economic progress, the growth opportunities for steel pipes are expected to abound.

Drilling down to specifics, water is expected to emerge as an essential business opportunity for your Company.

The Government, through the "Jal Jeevan Mission," in partnership with states, aims to make provision of potable tap water supply in adequate quantity, of prescribed quality and on a regular and long-term basis to every rural household by 2024.

Aligning with this ambition, the Union Budget 2023-24 has allocated a massive ₹70,000 crore to implement the Jal Jeevan Mission.

The state governments have also sharpened their focus on water connectivity in keeping with the Center's aim. The Rajasthan Government, in light of the groundwater conditions, has sanctioned five major surface water projects for Jal Jeevan Mission

connections. The Gujarat Government has also initiated various projects for providing water to its residents.

These efforts promise to open new opportunity windows.

At Surani Steel, we are increasing our capacity from 40,000 TPA to 300,000 TPA in a phased manner. The total capacity should be operational in 2027.

As part of the project, we are installing a Galvanizing Plant to produce high-quality GI Pipes, allowing us to widen our application horizon across diverse sectors and thereby emerging as a single-stop solution to all customer needs. We will also invest in contemporary equipment to manufacture bigger DIA heavy-thickness pipes. These strategic investments will expand our product basket to 600 SKUs from 300, with a more significant proportion of the SKUs being value-added products.

We are at the cusp of an exciting journey as we move forward. The potent combination of India's promising Marathon story over the next decade and our enhanced potential consequent to our strategic expansion provides considerable promise for accelerated growth.

In conclusion, I would like to thank our entire team for their relentless support and appreciate their commendable job. I sincerely thank all our stakeholders for their faith and support in our journey.

Warm Regards,
Vijay Singla
Managing Director

Management Discussion and Analysis

Indian Economy

India's economy showcased significant growth in the January-March quarter of 2022-23, with a GDP growth rate of 6.1%.

According to Quantico Research, the GDP growth in Q4 FY23 was more significant than anticipated, which was a welcome surprise. It appears to have been fueled by a general improvement in domestic drivers of private consumption, state consumption, and investments. Another consolation was the decreasing external trade imbalance. These factors contributed to an annual growth rate of 7.2%.

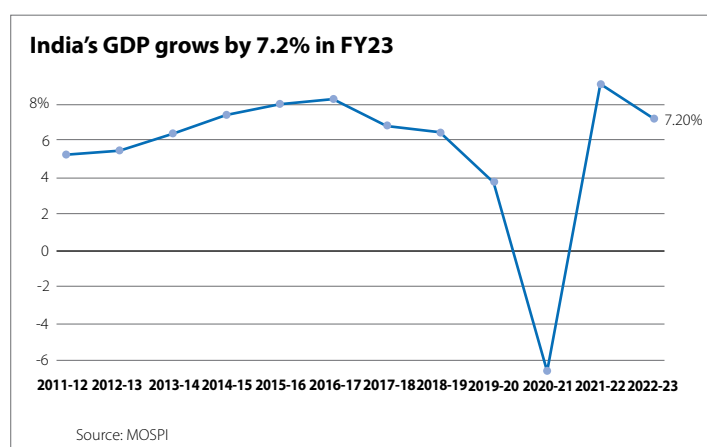

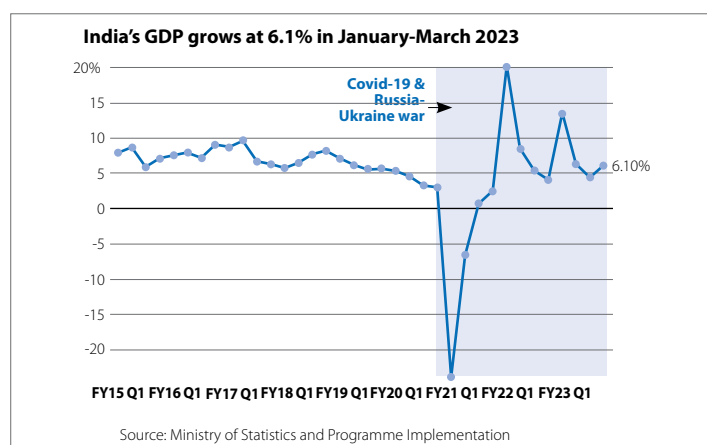

The growth boosted the Indian economy to US\$ 3.75 trillion and prepared the ground for it to reach the US\$ 5 trillion goal in the coming years.

Private consumption increased steadily and reached its highest level since 2006-07 at 58.5%, representing sustained growth, while exports of goods and services amounted to 23.5% of GDP, the highest level since 2014-15. From 2011 to 2023, India's GDP from Manufacturing rose from ₹5,088.17 billion to an all-time high of ₹7,382.00 billion. The gross GST revenue for the fiscal year 2022-2023 was ₹18.10 lakh crore, an increase of 22% over the prior year.

As we advance, global growth is anticipated to slow down in 2023 and remain largely muted in the following years. India's CAD in FY24 will likely increase due to the decreasing demand driving down commodities prices globally.

However, a quick rebound mainly spurred by domestic demand and, to a lesser extent, by exports poses a downside risk to the current account balance. With the improvement of the business and banking sectors' balance sheets, growth in India is anticipated to be rapid in FY24 due to a robust credit disbursal and capital investment cycle.

Even as India's outlook remains encouraging, global economic prospects for 2023 have been weighed down by the combination of a unique set of challenges expected to result in a few downside risks.

Indian Infrastructure:

The Government's expenditure on infrastructure is a captive source of income for big infrastructure players – cement and steel makers. The infrastructure sector's strength was what let the Indian economy withstand the threat posed by the pandemic. The Government's current infrastructure spending and domestic demand are putting the nation at the peak of a positive growth cycle.

The Government of India has approved investment proposals worth ₹564.2 billion (US\$ 6.88 billion) to state governments under a scheme that gives interest-free loans for infrastructure spending. While addressing the budget for 2023-24, the finance ministry declared that it would provide special assistance to states by extending 50-year interest-free loans worth ₹1.3 trillion during the ongoing financial year.

The Government's increased spending on infrastructure in FY 24 will push engineering, procurement, and construction companies to hit revenue growth of 17-20% and shoring their profitability. In the Budget 2023-24, the Government has increased the outlay for capital expenditure on the infrastructure sector by 33% from ₹7.5 lakh crore to ₹10 lakh crore. This buoyancy is supported by the expected strong order inflows owing to the Government's focus on infrastructure in the latest budget.

Government Programs

The Government has been focusing on policies to ensure world-class infrastructure creation promptly. Some of the schemes are :

National Infrastructure Pipeline: The main emphasis of this is on ease of living. It is a group of social and economic infrastructure

projects slated to be established over five years. The NIP will fulfill all the crucial factors that will help India achieve its target of becoming a US\$ 5 trillion economy by the financial year 2025.

National Logistics Policy: This policy aims to develop infrastructure, expand business and increase employment opportunities. This policy will attract global investments and help the country compete better with China and the USA in the globalisation age. The policy will improve the infrastructure, such as roads, rail and waterway networks, airports, logistics hubs, and digital services related to the sector. The logistics services will improve drastically and aid in India's mission - Self-Reliant India.

Sector-wise break-up of the NIP

Values in ₹ Lakh Crores

Roads, urban and housing, railways, power (renewable and conventional) and irrigation to comprise ~80% of the NIP

Indian Water Infrastructure:

A large number of Indians experience moderate to severe water stress. This difficulty is worsened by India's reliance on a monsoon that is becoming more unpredictable for its water needs. Even as the country experiences more floods and droughts, climate change will likely worsen this demand for water resources. However, by tackling these problems and creating an ecologically sound framework, India has continued to lead numerous international projects to safeguard the environment and its water supplies.

Since 1980, there has been an increase in water infrastructure in India. The country conserves only a tiny portion of its erratic rainfall across regions. Unlike arid-rich

countries (such as the United States and Australia) – which have built over 5,000 m³ of water storage per capita – and China – which can store over 1,000 m³ per capita – India's dams can only store about 200 m³ per person.

The Government has taken several initiatives in this area, from establishing a dedicated ministry for water resources to putting into practice a comprehensive strategy for conservation. With the advent of the Jal Jeevan Mission in 2019, about five crore households have rapidly been provided with similar water connections over the last two years – more than the number of households that obtained such connections in the last sixty-five years. This was launched to provide all rural families access to clean and sufficient drinking water through individual household tap

connections by 2024. It was designed to help the enormous and underprivileged rural Indian population.

Recently, on April 24, 2022, Mission Amrit Sarovar was launched to construct at least 75 ponds to overcome the water crisis in rural areas. Achieving resounding success in water conservation measures within months of its launch, more than 25,000 ponds have been constructed as part of the Yojana. Another initiative started for water conservation is the campaign 'Catch the Rain' under the flagship scheme of the Jal Shakti Abhiyaan. They initiated to promote awareness and put a special action plan for rainwater conservation in the country. As part of this campaign, the Government has increased awareness of issues like planting trees, cleaning up, building puddles, and other activities.

Steel Industry

India currently ranks as the World's 2nd Largest Producer of Crude Steel, surpassing Japan in 2018, with an output of 33.2 MT in January-March 2023, showing a yoy growth of 3.0%. India is a net steel exporter, witnessing an export of 6.72 MT of finished steel against the import of 6.02 MT in 2022-23. The country was a net importer of steel in 2014-15 with 9.32 MT imports Vis-à-vis the export of 5.59 MT.

India's finished steel consumption increased by 12.7% on the year to 119MT in 2022-23, while crude steel output rose by 4.2% against the previous year to 125MT, according to provisional data from the steel ministry's joint plant committee.

The Indian Steel Association (ISA) forecasts a 7.5% growth in steel demand in fiscal year 2023-24 to 128.85MT, driven by strong infrastructure spending. The association also expects a 6.3% growth in steel demand to 136.97MT in fiscal year 2024-25.

Key parameters	FY 2014-15	FY 2022-23	% increase

PERFORMANCE OF INDIAN STEEL INDUSTRY

Steel Pipes and Tubes

With a nearly 8% contribution to India's steel consumption, the Indian steel pipe industry is one of the significant verticals in the Indian steel industry. Steel pipes and tubes are produced in various diameters depending on the purpose and can be divided into two categories: Submerged Arc Welded and Seamless (S&S) and Electric Resistant Welded (ERW). The industry has been valued at roughly 50,000 crores overall, with value shared equally between the two categories.

The global Steel pipes and tubes market size was US\$ 94 billion in 2022 and is expected to reach a value of US\$ 122.65 billion in 2032 and register a revenue CAGR of 3% during the forecast period. The primary factors driving the market revenue growth are emerging nations' rapid industrialisation and growing requirement for infrastructure development. Manufacturers are constantly developing technologically advanced products to address the demand for efficient and long-lasting steel pipes and tubes.

Due to increased demand from several end-use industries, including oil and gas, construction, the automobile industry, and others, the market for steel pipes and tubes is proliferating. Due to their extensive usage

in transporting and distributing oil and gas, steel tubes and pipes are in great demand. The World's growing urbanisation and population, which have raised the demand for residential and commercial buildings, are other factors driving the need for steel pipes and tubes.

One of the main factors driving the growth of the steel pipes and tubes market is the rising demand for reliable and durable infrastructure, particularly in emerging economies. Due to considerable expenditures made by various governments in infrastructure projects like roads, bridges, and airports, there is an increase in demand for steel pipes and tubes.

The market is also growing due to the rising need for steel pipes and tubes in the automotive sector. Steel pipes and

tubes are extensively used to manufacture automobile components such as fuel injection, structural, and exhaust systems.

Seamless steel pipes and tubes are a significant market driver due to their exceptional attributes, including high strength, corrosion resistance, and lifespan. These pipes are widely used in various systems, such as those for oil and gas exploration, hydraulic systems, and power generation.

However, the market for steel tubes and pipes also confronts several challenges, such as varying raw material costs, increased competition from replacement materials, and stringent government regulations restricting the use of particular chemicals in the manufacturing process.

REPORT ON THE AUDIT OF STANDALONE FINANCIAL STATEMENTS

We have audited the accompanying standalone financial statements of M/s. SURANI STEEL TUBES LIMITED ("the Company"), which comprise the Balance Sheet as at 31st March 2023 the Statement of Profit & Loss for the year then ended Including the cash flow statement for the year ended on that date annexed thereto, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2023, and its loss and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

There are no Key Audit Matters Reportable as per SA 701 issued by ICAI.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the Accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safe guarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the company's financial reporting process

Auditor's Responsibility

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and

perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about

the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.
